The attitude of the board of control in regard to the salaries of state employees is explicitly stated in a resolution offered by Roland E. Stevens at the meeting of June 22, of which final record has been made. The resolution is as follows: "That as a policy, this board should favor a reduction rather than an increase in salaries and wages, but believes that efficient service should be well rewarded and that it should be the price consideration."

If the legislature votes the money for a federal aid project, it is understood that a hard surface road, probably cement, will be put in through South Burlington. Probably very little work would be necessary outside the surfacing.
